Vasireddy Abhishek Sai

Hyderabad, TG | abhivasireddy13@gmail.com | +91-9491886476 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven Computer Science student specializing in AI/ML with hands-on experience in data analytics, machine learning, and cloud-based data engineering. Proficient in Python, SQL, and BI tools with a strong foundation in NLP, deep learning, and end-to-end data pipelines. Seeking roles in Data Analytics or AI/ML Engineering to deliver actionable insights and intelligent solutions.

EXPERIENCE

Data Analyst & AI/ML Intern | Incresol, Hyderabad, TG *Jan 2026 – Present*

- Analyzing business datasets to extract actionable insights and support data-driven decision-making using Python and SQL.
- Building and deploying machine learning models to automate processes and improve operational efficiency.
- Designing automated workflows using n8n for data integration and process automation across business tools.
- Creating analytical dashboards in Metabase to communicate key metrics and findings to stakeholders.
- Managing and querying PostgreSQL databases using pgAdmin for data storage, retrieval, and optimization.

PROJECTS

AI Agents for Medical Diagnostics — *Python, Multi-Agent AI, LLMs*

- Built an open-source multi-agent system that analyzes medical cases in parallel, generates possible diagnoses, and combines specialist-style reasoning for reliable recommendations.
- Designed agent orchestration architecture enabling concurrent specialist AI agents to collaborate on complex diagnostic workflows.

Amazon Customer Reviews — Enhanced Product Insights — *Python, NLP, Scikit-learn, Jupyter*

- Developed a data analysis pipeline processing Amazon customer reviews using sentiment analysis and text processing to classify reviews and identify key product features.
- Applied CountVectorizer, TF-IDF, and cosine similarity techniques to derive business insights from unstructured text data.

Olympic Data Analytics — Azure End-to-End Pipeline — *Azure Data Factory, Databricks, Synapse Analytics, PySpark*

- Designed and implemented an end-to-end cloud data pipeline on Azure using Data Factory for ingestion, Databricks for transformation with PySpark, and Synapse Analytics for querying.
- Demonstrated mastery of modern data engineering architecture for large-scale analytics workloads.

Spotify Analytics Dashboard — *Power BI, Spotify API, Python*

- Built an interactive Power BI dashboard to analyze real Spotify streaming data, integrating the Spotify API for real-time data extraction and visualization.

AI-Cervical-Cancer-Detection — *Python, Scikit-learn, Classification Models*

- Developed an ML pipeline for early cervical cancer detection using data preprocessing, feature selection, and classification models to improve diagnostic accuracy.

SKILLS & TECHNOLOGIES

Programming & ML: Python, SQL, Scikit-learn, TensorFlow, PyTorch, NLP, PySpark

Data & BI Tools: Power BI, Tableau, Metabase, Looker Studio, MS Excel, Jupyter Notebook

Cloud & Databases: Microsoft Azure (Data Factory, Databricks, Synapse Analytics), PostgreSQL (pgAdmin), MySQL

Automation & Workflow: n8n, APIs, Apache Pig, Apache Superset

Relevant Courses: Machine Learning, NLP, Deep Learning, Data Analytics, Data Structures & Algorithms

EDUCATION

B.Tech in Computer Science (AI & ML) *2021 – 2026*
Manipal Institute of Technology, Manipal, KA

Intermediate (MPC) *2019 – 2021*
Sri Chaitanya Junior College, Hyderabad, TG

CERTIFICATIONS

Deloitte Australia — Data Analytics Job Simulation (Forage) | *March 2025*

- Performed data analysis and created a Tableau dashboard; used Excel to classify data and draw business conclusions.

Goldman Sachs — Software Engineering Virtual Experience (Forage) | *February 2025*

- Assessed IT security vulnerabilities, cracked hashed passwords using Hashcat, and proposed improvements to password hashing and security policy.
